

Verge Preparation Checklist for Client and Contractor

Version 1.0

Date Reviewed: 2-12-21

Purpose of this checklist is to assist with Client/Contractor (with/without APACE involvement) site consultation.

Steps

1

Does the site require a plan to be submitted to Council, or are there other issues that require design/layout and a plan, or tree application ? If so, what is recommendation to Client

Y/N

2

Weed Management? Is this required and if so - timing, type and how many recommended? Qualified person (certification?)

Y/N

3

Does the soil need decompaction, releveling? If so, how much soil reduced?

Y/N

4

Recommend any additional soil improvement be added during decompaction?

Y/N

5

Describe final finished level - Options:

Option 1: Reduce level distance 2m back from kerb to ~0.075m below kerb level

Option 2: Reduce overall level to allow native landscape mix to be added ? Cost?

6

Mulch

Y/N

Estimate on mulch volume required (based on area and soil levels):

Mulch recommended: Amazon Sandgroper Mulch to Australian Standard AS4454

7

Hardwood Chip

Is there a need for a 0.5m hardwood woodchip boundary on verge for foot traffic?

Y/N
